Get corporate era group proudly dedicates to the people of this world the structural technology of high-tech modern natural asset (HMNA) which is the asset suitable for the modern business age (HMNA) which has been properly calculated and encrypted natural resources with the help of Panchabuthams for the benefit of the human race and biodiversity conservation.

### HMNA(Hi-tech modern natural asset) STRUCTURAL TECHNOLOGY:

#### CLARITY:

In the act of owning a specific property, legally establishing its own right over it, and enjoying the benefits resulting from it, the right to fully enjoy the benefits of the property, excluding the disadvantages and losses caused by the exclusive right, including the benefits obtained by the exclusive right, and the right to fully enjoy the benefits resulting from the property, is a company that includes great high-tech modern evolutionary principles. HMNA is a safe, essential natural asset built by charity through charity.

#### PREVIEW:

The plan to create natural assets is to eliminate the risks of the previous generation of assets in the evolution of the assets and to solve the problems therein, and in addition to the natural risks, the contributors who have invested in the bio-technological modern natural assets due to external activities and global trends should construct implementations so that there are no obstacles to the development. In any circumstances, it should be structured so as not to cause loss of time, material, value and money to the investors and thereby support the provision of ethical political administration.

## Preparation:

- 1) To structure the property ownership scheme, the organization should be formed, and everyone in the organization should qualify themselves as "virtuous" minded and concerned with nature and public welfare.
- 2) Constituent legal committee should be set up to get clarity on natural law, international evidence laws, international constitutional aspects, self-constitution constitutional rights obligations.
- 3) During the time of developing the property and implementing the project, the Secretariat should build biodiversity conservation as per the need not only for the human species but also for any species that is affected.
- 4) When constructing a biotechnological modern natural asset the evolution of the asset should include all the artifacts of the previous generations of assets.
- 5) There should not be any restriction in the operations of the crop variety selection program to prevent the use of artificial fertilizers and chemicals in short term yield expectations. So it is best to choose only suitable long-term crops.
- 6) The tree crop chosen to form the asset should have its stable value in domestic and international markets at any given time.
- 7) International trade, monetary policies, economic trends, human and social environment, international justice aspects, international political trends should have clear statistical data in the garden.
- 8) Crop insurance, minimum source purchase price, risk management, operational costs should be accurately predicted and the project calculation should be structured based on the calculation aspects under actuarial science based on the data.

9) Sub-divisions should be structured into departments within the organizations with bus administrators for crop growing land selection, legal possession, project contributors, crop selection, crop breeding, crop protection crop harvesting, yield asset evaluation, marketing strategy, marketing management, financial management, processing etc.

10) Departments should structure the principles of soft conceptual exchange that share activities and solutions among themselves.

## MAKING PLANS:

1) Investors in HMNA should achieve economic independence in their lives, springing up property including property, moral obligations, natural rights etc.

2) The asset creating company should offer its share unconditionally to the contributors to encourage them to purchase the asset.

3) By getting the participation of charities, international governments, international organizations, foundations, community development organizations and sharing them with investors, these organizations should build a joint plan to achieve their respective goals, benefit the owners, develop the company, and boost business to complete the project.

4) An agreement should be entered into with the relevant company for the purchase of the property and after the purchase the property will be mortgaged and given credit, or should be formed and operationalized as a subsidiary company.

5) All data of asset creation, offerings, transaction plans, centralization, decentralization, audit, production etc. should be uploaded in the company's own website truthfully and transparently.

6) Property details should be arranged through the website for

information by the international management community.

15) Under no circumstances should any act of prejudice to the purchasers of this property be avoided.

16) Buyers of this asset should build simple mechanisms that directly lead to economic freedom while protecting generations from financial deprivation.

## IMPLEMENTATION:

- 1) All techniques should be used
- 2) Without changing the law of nature, the international law of evidence, humanitarian character, awareness about the nature of property, buying property, selling mortgage, borrowing, borrowing, etc.
- 3) These facilities should be brought into operation immediately. All conditions shall be solely for the benefit and protection of the purchasers of this property.
- 4) Formulate solutions to contemporary global threats to humanity and operationalize them through programming.
- 5) To create a humane human society with crime free economic freedom.

## LOGIC.

### Mathematical:

$$1+5=6, 1+1=2$$

### HMNA:

$$1+\text{Famine Goblin}=\text{Multiple.}$$

$$1+\text{Nature}=\text{Infinity } \infty \square$$
